Welcome to Korff

Yannick Erb, owner and president

We are the “watchmakers” of the aluminium foil industry.

Thanks to our large warehouse, flexible, quality-conscious and order-specific working methods, we always offer our customers the best possible service.

Aluminium foils in stock

- Thickness 0.008 mm – 0.300 mm
- Width 10 mm – 1,250 mm
- Hardness: soft, 1/2 hard and hard
- Composite aluminium foils
- Self-adhesive aluminium foils

Korff AG has adjusted to the pleasing growth in the volume of business since its foundation in 1984 by constantly expanding its infrastructure.

A flat hierarchy which keeps the overheads low is one of the keys to our great competitive strength. In addition, cost-intensive changeover times for important machines have been „tuned down“ by ingenious modifications, allowing us to produce even small batch sizes economically.

Our customers particularly appreciate that we can thus cover a wide variety of aluminium foils to meet their needs in a very short space of time.

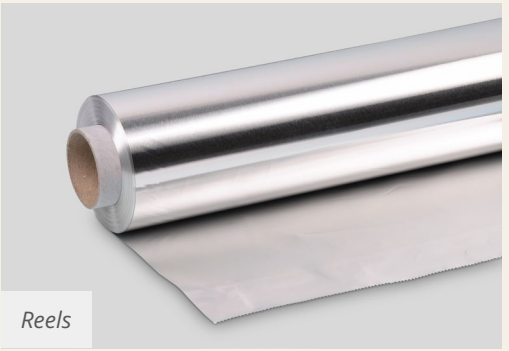

Thanks to many years of experience and great technical ingenuity, we develop solutions for complex requirements in the industry sector and – often in close cooperation with our customers – these are implemented in successful products (for the pharmaceutical industry, for electrical engineering and the automotive industry, for example).

We supply aluminium foils and strips for numerous applications – quickly and „just in time“

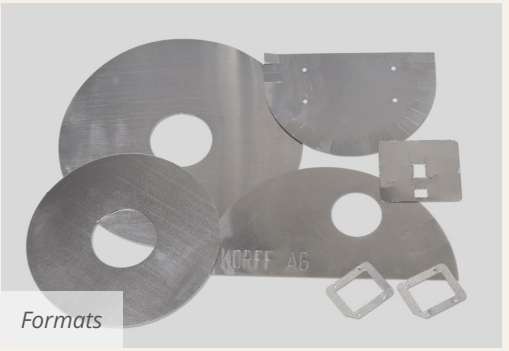

Korff AG can supply a very extensive range of products. In the consumer segment these include foils for airline catering, confectionery foils, pop up sheets, hair foils, DIY foils, etc. We have an even wider programme for the industrial sector – this ranges from laboratory foils, formats, stamped parts through to variously combined reels.

The comprehensive stocks, versatile machinery and our flexibility mean that we can cater to customer wishes in a very short space of time: rolled, folded, stamped, embossed, printed or perforated.

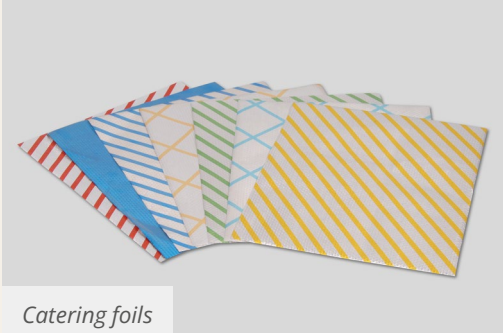

We owe the fact that we can supply over 2,000 customers in more than 40 segments of industry not least to this great efficiency.

Special products for the construction sector

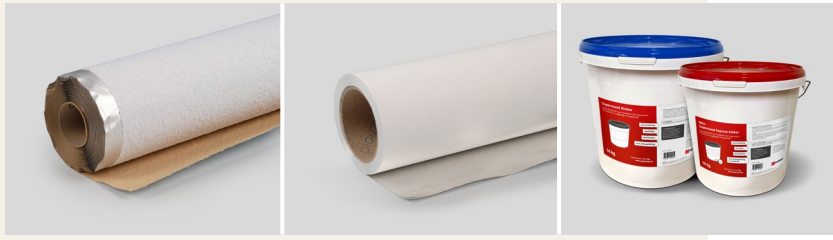

Vapor barriers for dry structural elements
We can offer aluminium vapor barriers that consistently prevent moisture damage according to your requirements.

No more mould and black spots
With our Superwand DS and PRO insulation panels, you can permanently remove mould and black spots.

Vapor barriers for your home
Due to different surfaces and the structure of the material our vapor barriers are ideal for the application at your home. They protect you against electro smog and can easily be used for renovations.

Soundproofing: unheard of efficiency
The ingenious construction of the HAWAPHON sound insulation panel is the reason why things are so quiet around our boards.

Quality as a commitment

From accurately recording customer requirements to delivering on time and in accordance with the order, we are committed to the consistent application of our ISO 9001, ISO 14001, FSSC 22000, and AEO-certified quality management system on a daily basis.

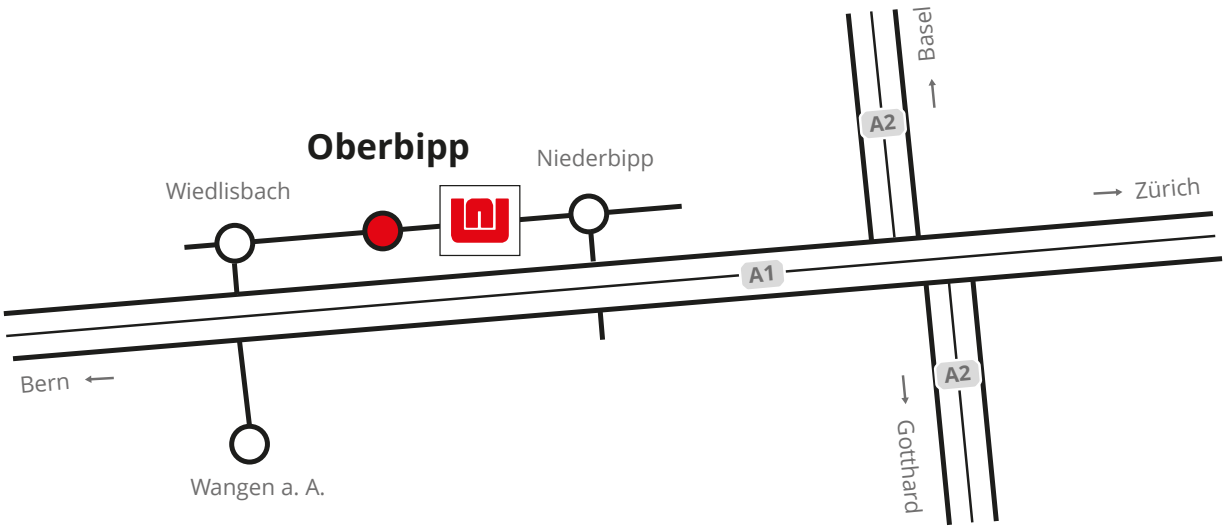

We are also internationally competitive thanks to optimised workflows, continuous investments, long-standing co-operations with very efficient suppliers and a high motivation.

More than two thirds of our products are exported, the majority to the EU region. Export orders are handled smoothly and efficiently thanks to the accumulated experience of deliveries to four continents – just like Swiss clockwork.

Further locations
Since 2015 the Korff Isolmatic companies in Poland and Germany are subsidiaries of Korff AG. Korff Isolmatic is specialized in the manufacturing of insulation, and offers in addition to large quantities, also individual solutions for small series.
